CONSULTATION REFERRAL

Patient	HARRISON, Walter	DOB	1958-03-04 (68 M)
Health card	4821-663-190 WH	Phone	416-555-2210
Address	44 Rosewood Ave, Toronto ON M4E 2K1		
Referred to	Dr. A. Patel - Urology Associates of Ontario, 500 University Ave, Toronto ON		
Date	2026-06-12	Referring MD	Dr. J. Halstead, CCFP

Reason for referral: 68M with painless gross hematuria - please assess to rule out urothelial malignancy.

Dear Dr. Patel,

Mr. Harrison is a 68-year-old man who presents with two episodes of painless, visible (gross) hematuria over the past three weeks, with clots on the second occasion. No dysuria, frequency, or flank pain. He is a 40 pack-year smoker (current). Given his age and smoking history I am concerned about a urothelial malignancy and would appreciate cystoscopy and upper-tract imaging. Urine cytology and CT urogram have been arranged and results are attached.

PAST MEDICAL HISTORY

- Hypertension
- Type 2 diabetes mellitus
- Hyperlipidemia
- Prior TURP considered - declined 2022

PAST SURGICAL HISTORY

- Inguinal hernia repair (2009)

ALLERGIES

- No known drug allergies

MEDICATIONS

- Amlodipine 5 mg PO daily
- Metformin 1000 mg PO BID
- Rosuvastatin 20 mg PO HS
- ASA 81 mg PO daily

SOCIAL HISTORY

Current smoker, 40 pack-years. Alcohol 3-4 beers/week. Retired machinist. Lives with wife.

FAMILY HISTORY

Father - bladder cancer (age 74). Mother - hypertension.

EXAMINATION

BP 148/86, HR 76. Abdomen soft, no palpable mass. No CVA tenderness. DRE: benign, mildly enlarged prostate. Thank you for seeing this patient. Please do not hesitate to contact me with any questions. Relevant investigations are attached.

Kind regards,

Dr. J. Halstead, CCFP

Diagnostic Imaging Report

Patient: HARRISON, Walter

DOB: 1958-03-04

Exam date: 2026-06-10

Exam: CT Urogram

Referring: Dr. J. Halstead, CCFP

Acc: 318420

CLINICAL HISTORY: Gross hematuria.

FINDINGS: Focal irregular wall thickening along the left lateral bladder wall measuring 1.8 cm, enhancing on post-contrast phase. No hydronephrosis. Kidneys enhance symmetrically; no renal mass or calculus. No retroperitoneal lymphadenopathy.

IMPRESSION: Enhancing left bladder wall lesion, suspicious for urothelial carcinoma. Cystoscopy advised.
